

Summit Racks' innovative and patent pending bracket systems allow installation of a rain gutter style rack system to the bed rails of your pick-up!

MOUNT A RAIN GUTTER STYLE RACK SYSTEM TO YOUR PICK-UP'S BED RAILS! Summit Racks' bracket system is designed to allow any rain gutter style rack system, like those manufactured by Thule® & Yakima®, to be attached to the bed rails of your truck! This gives you the option to use the rack system and accessories you prefer!

EASY REMOVAL AND REINSTALLATION! Summit Racks' bracket system is designed to allow easy removal and reinstallation of your rack system. Simply loosen the rain gutter towers and lift the rack system from your truck in just minutes and it reinstalls just as quick!

QUALITY BUILT IN USA! Summit Racks' brackets are produced in the USA with quality and durability in mind! Features include, powder coated finish, stainless steel fasteners and neoprene pad(s) to protect your vehicles finish.

NO HOLES TO DRILL! Summit Racks' brackets clamp / bolt to your vehicle without having to drill holes!

INSTALL A BED COVER! Summit Racks' bracket system is designed to allow the installation of most soft bed covers! Now you can rack all your equipment and still keep your gear dry and secure under the bed cover!

For tips on installing a bed cover, check out our bed cover installation guide at www.summitracks.com.

OPEN BED RAIL & CARGO-MANAGEMENT BRACKETS! Summit Racks' bracket systems are available in several sizes for both open bed rail and trucks equipped with cargo-management rails! Go to www.summitracks.com and select a bracket system for your truck today!

MAINTAIN FULL USE OF TRUCK BED! By installing a rain gutter rack system using Summit Racks' brackets, you virtually double your cargo space!

Plus, the low profile bracket design consumes virtually zero bed space so you can still use your truck as a truck when the rack system is removed.
